

# Social investment

## Our impact

The digital revolution is transforming society and how livelihoods are created and maintained. However, in many instances, the advent of technology has also resulted in a deepening and widening of long pre-existing social and economic disparities, between the “haves” and the “have-nots”. We can only flourish when the communities and ecosystems within which we operate are healthy and growing.

We leverage our core capabilities to enable the socio-economic development of the communities within which we operate. Through our Corporate Social Investment, we strive to make a meaningful and measurable impact on society.

We continue to evolve our mechanisms to track the impact of our CSI to ensure that our programmes reach marginalised and diverse group of beneficiaries while impacting as many people as possible. This will place us as a partner in development, helping in the realisation of the national developmental agendas of each of our host countries and the United Nations Sustainable Development Goals.
